Allowable Subject Matter

Claims 1-7, 9 and 11-17 are allowed.

The following is an examiner's statement of reasons for allowance: patentability resides, at least in part in the high-density connector having a housing and a plurality of distinct first and second sets of terminals including differential signal and ground terminals wherein the housing is formed from first and second interengaging segments wherein the first segment supports a first set of distinct terminals, and the second of said segments supports the second distinct set of terminals; and the two distinct sets of terminals being disposed in at least two rows on said housing, the first and second distinct sets of terminals being inverted with respect to each other within the housing., in combination with the other limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morlion et al. 5,554,038 and Crofft et al. 6,371,773 were cited for similar high-density connectors.
